

Customer Guide: Activating AEC Data Model API in ACC

1. Activating the AEC Data Model Feature

Step 1

Log in to ACC as the **Account Administrator**.

Step 2

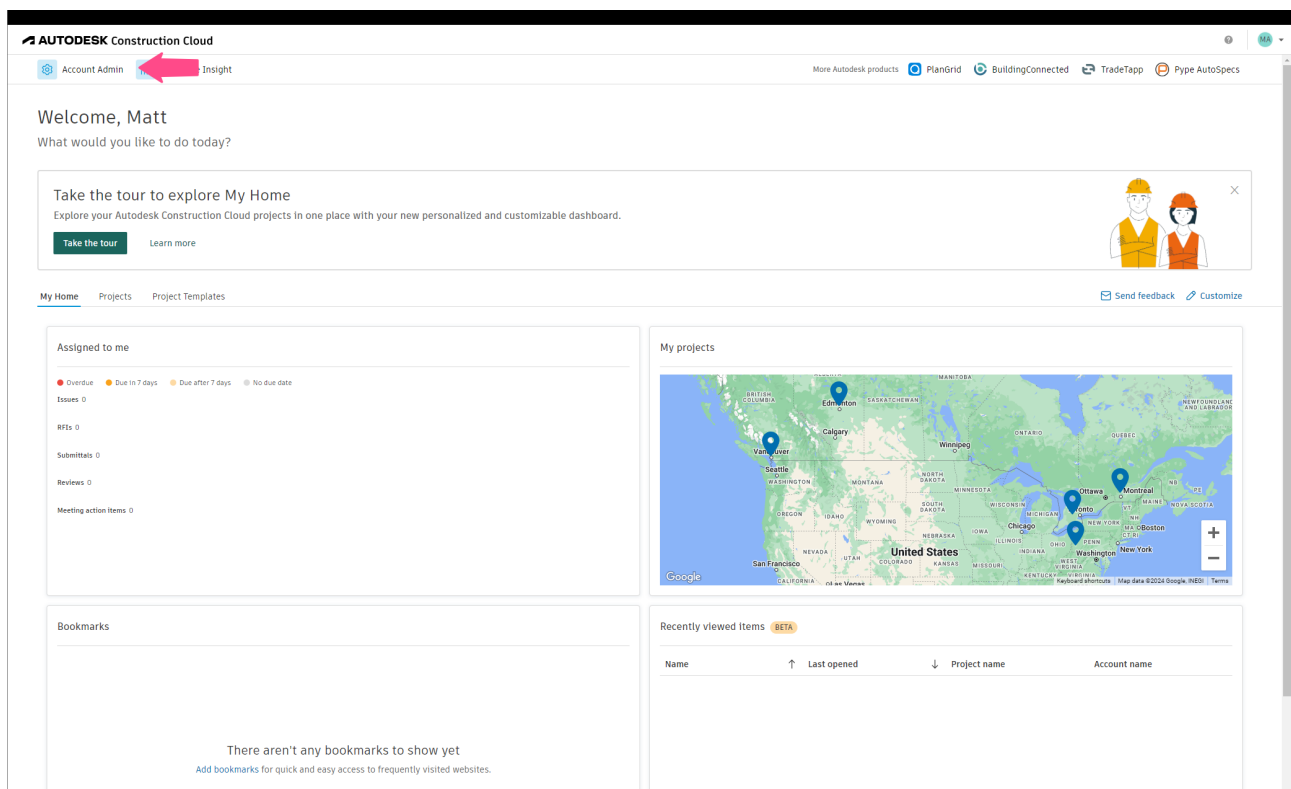

Navigate to **Account Admin** → **Settings**.

Step 3

Locate the **AEC Data Model** section and click **Activate**.

⚠ Activation is at the **account level**. Only models uploaded after activation will generate AEC Data Models.

Activate

2-Step verification

Require members to complete 2-step verification to access your projects.

No

If members already utilize single sign-on, 2-step verification isn't required.

2. Adding Your APS Client ID in Custom Integrations in ACC

Step 1

Log in to ACC and Go to **Account Admin** → **Custom Integrations**.

Step 2

Click **Add Custom Integration**.

Step 3

Fill in the required details:

- **Autodesk Platform Services Client ID** (provided to you).
- **Custom Integration Name** (a recognisable name for your app).
- **Description** (optional, but recommended for clarity).

Step 4

Click **Add** to save the integration.

Once saved, the integration will appear in your Custom Integrations list.

Custom integrations you create will be displayed here.

3. Workflow Overview

1. Admin activates the AEC Data Model feature.
2. Admin registers the APS Client ID in Custom Integrations.

3. Models uploaded to ACC Docs are automatically processed with AEC Data Model.
4. The registered Client ID is authorised to make API calls.

NOTE: APS CLIENT ID: *iOjwAgQ3W4Nu1HNXkhByE9JC7deE7Dclua3pAY4ZWhccrXAs*
